Voltage: 3.7V
Number of Vibrations: 7
User time: Lowest - 70 mins, highest - 60 mins
Sound Level: 60db

CHARGING INSTRUCTIONS

This vibrator arrives with an 80% charge, so it is not necessary to charge it before use, but it will not harm the battery if you choose to do so.

Connect the USB plug into the USB port of your computer or other output and the other end of the DC charger into toy's input.

Initial charge will take about 2 hours to complete, and subsequent charges will also take about 2 hours to complete.

The indicator light will be flashing while device is charging, and remain solid when toy is fully charged. There is no danger of battery damage by overcharging, but it's recommended not to overcharge for long periods of time.

Charge lasts for about 2 hours of play time using one function, and about 50 minutes using both motors. This toy operates at a sound level of less than 60db with a voltage of 3.7V. The battery operates at 750mAh.

INSTRUCTIONS FOR USE

This toy has an easy-to-use 3 button control panel. The shaft vibration and thrusting motion are operated separately, each with their own button.

Press the bottom Power Button to turn both motors on. The LED lights will illuminate, and both motors will go into standby mode.

Press the top Thrusting Button to initiate the thrusting action, pressing again to cycle through 3 different thrusting speeds.

Press the middle Vibration Button to initiate the vibration in the shaft, pressing again to cycle through 7 different functions and speeds.

Press the bottom Power Button for 2 seconds to turn both motors off.

This toy also has an additional "Travel Lock" feature. To activate it, press the Power Button for 3 seconds. This will allow you to hit any button on the toy without activating it, perfect to use for traveling or long term storage. To unlock Travel Lock, press the Power Button for 3 seconds.

USB RECHARGEABLE
