**ZERO TOLERANCE**

**Product Specifications:**

Material: ABS & Silicone  
Battery: Polymer lithium  
Voltage: 5.0V  
Number of Vibrations: 10  
User time: 40 - 60 Minutes  
Sound Level: <55dp

**CHARGING INSTRUCTION**

This vibrator arrives with a high partial charge but it is recommended to charge it fully before first use. The initial charge will take about 50 minutes and subsequent charges will take about 120 minutes to complete.

Connect the USB plug into a power source and the other end of the DC charger into toy's input on the side of the shaft under the head. The LED light will flash on the toy while the device is charging and remain solid when fully charged. There is no danger of battery damage by overcharging, but it's recommended not to overcharge for long periods of time.

Charge lasts for about 50 minutes of play time on the lowest vibration level, and about 40 minutes of play time on the highest level. This toy operates at a sound level of 60db with a 350mAh lithium battery at 3.7V.

**INSTRUCTIONS FOR USE**

**TO OPERATE WITH TOY BUTTONS DIRECTLY**

Turn the toy on by pressing the button at the bottom of the toy's base for at least 3 seconds. The button will light up and the toy will enter standby mode. Press this button again more quickly to cycle through 10 speeds and patterns of vibration in both motors. Turn the toy off by pressing the button for at least 3 seconds.

**TO OPERATE WITH REMOTE CONTROL**

Once the toy is turned on with its own button, turn on the remote control by pressing its button for at least 3 seconds. Press this button again more quickly to cycle through 10 speeds and patterns of vibration. The eleventh click will put the toy in standby mode. Turn the remote off by pressing the button for at least 3 seconds, and turn the toy off using the button at its base. The remote control cannot turn the toy off completely.

**USB RECHARGEABLE**
